Tomas Leriche

Senior Software Engineer | Frontend & Full Stack

samotleriche@gmail.com | +1 (505) 699-6027 | tomasleriche.com

github.com/samotleriche | linkedin.com/in/tomasleriche

Senior software engineer specializing in React, Next.js, and TypeScript. Experienced in engineering leadership, polished user interfaces, and using AI tools to accelerate development while maintaining code quality.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, HTML, CSS, Sass, Tailwind CSS

Backend and data: Node.js, Express, PostgreSQL, MongoDB, MySQL, Prisma, Firebase

Testing and delivery: Storybook, Vitest, Playwright, Jest, GitHub Actions, Git, Vercel, AWS, Docker

Design and interaction: Figma, GSAP, Three.js, React Three Fiber, Spline, Rive

PROFESSIONAL EXPERIENCE

Gradle Inc. Sep 2023 - Dec 2025

Senior Software Engineer | Full-time | Remote

- Built Gradle's modernized Next.js application from the ground up, partnering with design and marketing throughout development.
- Translated ambitious designs into pixel-perfect, fully responsive interfaces with complex GSAP animations.
- Built a reusable component library in Storybook.
- Mentored engineers on Next.js, SEO, and GSAP, and partnered with designers to define scope and delivery timelines.

Technologies: TypeScript, React, Next.js, Tailwind CSS, GSAP, Storybook, Vitest, Playwright, GitHub Actions, Pardot, Figma, Spline, Rive, Cursor, Claude, GTM, GA.

Long Lost Friends Feb 2022 - Sep 2023

Head of Software Development | Full-time | Remote

- Led engineering for a nine-person team, overseeing full-stack software development.
- Staffed engineering and design teams.
- Selected application architectures based on project requirements and contributed to project budgeting and management.
- Established design and development workflows to coordinate work across teams.

Technologies: TypeScript, React, Next.js, Prisma, MongoDB, AWS, Vercel, OpenAI, NextAuth.js, Three.js, Solidity, ethers.js

Futureverse formerly Non-Fungible Labs Sep 2021 - Jan 2022

Senior Full-Stack Software Engineer | Full-time | Remote

- Built minting pages for ERC-721 and ERC-1155 tokens, audio players for audio NFTs, and an NFT marketplace.
- Translated designs into responsive interfaces and interactive 3D web experiences using Next.js, Three.js, and GSAP.
- Implemented SEO practices and mobile-first styling with SCSS.

Technologies: TypeScript, React, Next.js, Three.js, GSAP, SCSS, Web3.js, ethers.js

PROFESSIONAL EXPERIENCE CONTINUED

Atlassian Mar 2021 - Sep 2021

Full-Stack Software Engineer | Austin, TX

- Designed and tested reusable React components with Storybook, translating design wireframes into responsive interfaces.
- Integrated Magnolia CMS content into React components to support SEO, and built and integrated microservice APIs.

Technologies: TypeScript, React, Storybook, Jest, Magnolia CMS, Styled Components, Bitbucket

Improving formerly Object Partners Aug 2020 - Feb 2021

Full-Stack Software Engineer | Full-time | Plano, TX

- Built reusable React components and responsive interfaces using CSS Grid and Flexbox.
- Implemented server-side rendering with Next.js and integrated a GraphQL API.

Technologies: TypeScript, React, Next.js, GraphQL, CSS, GitLab

Cognizant Apr 2019 - Aug 2020

Full-Stack Software Engineer | Full-time | Plano, TX

- Built Spring Boot microservices deployed to Pivotal Cloud Foundry and developed interfaces with Angular and Angular Material.
- Developed Concourse CI/CD pipelines and integrated GitLab and Azure DevOps APIs to automate repository creation and code pushes.
- Practiced test-driven development and pair programming.

Technologies: Java, Spring Boot, Angular, Kotlin, Concourse, GitLab, Azure DevOps, Artifactory, JUnit, Mockito, Jasmine, Karma

University of New Mexico Aug 2016 - Jan 2019

Graduate Technical Research Assistant | Part-time | Albuquerque, NM

- Built a Node.js REST API, MySQL database, and validated data-entry interface to support a research team.
- Deployed the service on Heroku, secured API endpoints with Passport.js, and implemented natural language processing with R and tidyverse.

Technologies: JavaScript, Node.js, Express, MySQL, R, tidyverse, Bootstrap, Passport.js, Heroku

EDUCATION

Master of Science in Information Systems and Assurance

University of New Mexico | December 2018

Bachelor of Science in Molecular and Cellular Biology

University of Puget Sound | May 2014

LANGUAGES

English: native | French: fluent | Spanish: conversational
